

Frontend Tests

Vitest

1. Install the packages

```
bun install @types/node jsdom @testing-library/jest-dom @testing-library/svelte
@testing-library/user-event @vitest/ui jsdom vitest
```

2. Add Scripts to package.json

```
{
  "scripts": {
    "test": "vitest run",
    "test:ui": "vitest --ui",
    "test:watch": "vitest"
  }
}
```

3. Add configuration to tsconfig.json

```
{
  "compilerOptions": {
    "types": ["@testing-library/jest-dom"]
  }
}
```

4. Add configuration to vite.config.ts

```
import { svelteTesting } from '@testing-library/svelte/vite';

export default defineConfig({
  test: {
    environment: "jsdom",
    setupFiles: ["./vitest-setup.js"],
  }
});
```

5. Create vitest-setup.js in project root and add configuration

```
import '@testing-library/jest-dom/vitest'
```

6. Write tests
7. Execute tests

```
bun run test:ui
```

Cypress

1. Install the packages

```
bun install cypress
```

2. Add configuration to tsconfig.json

```
{
  "compilerOptions": {
    "types": [
      "cypress"
    ]
  },
  "include": ["**/*.ts"]
}
```

3. Add configuration to vite.config.ts

```
import { svelteTesting } from '@testing-library/svelte/vite';

export default defineConfig({
  test: {
    environment: "jsdom",
    setupFiles: ["./vitest-setup.js"],
  }
});
```

4. Start Cypress

```
bunx cypress open
```
